BLK

BRN

Breathable leather upper

Natural leather provides a high degree of wearer comfort combined with durability in versatile applications.

Ladder Grip (LG)

Especially defined contour in the shank area of a safety shoe to provide additional safety while standing on ladders.

Oil & fuel resistant

The outsole is resistant against oil and fuel.

S3

S3 safety shoes are suitable for work in an environment with high humidity and presence of oil or hydrocarbons. These shoes also protect against perforation risk of the sole, and foot crushing.

Scuff Cap (SC)

Separately tested material to cover the toe cap area to reduce abrasion of the upper material (e.g. during kneeling operations) and extend usability of the safety shoe.

Slip resistance (SR)

Replaces the previously used term of SRA+SRB=SRC. SR means the slip test has been executed on tiles contaminated with soap and with oil.

Industries:

Chemical, Construction, Food & beverages, Industry, Logistics, Mining, Oil & Gas

Environments:

Wet environment, Uneven surfaces, Dry environment, Muddy environment, Extreme slippery surfaces

Maintenance instructions:

To extend the life of your shoes, we recommend to clean them regularly and to protect them with adequate products. Do not dry your shoes on a radiator, nor nearby a heat source.
